Ahmed Adam Abdelghani Hussien

AI Automation & Agentic AI Engineer

Beni Suef, Egypt | +20 121 194 6704 | ahmed47p3@gmail.com | linkedin.com/in/ahmedadamabdelghani

PROFESSIONAL SUMMARY

AI Automation and Agentic AI developer who builds n8n workflows and LLM-powered agents that connect to business tools through REST APIs, webhooks, Gmail, Google Sheets and WhatsApp. Delivers freelance automation, with hands-on experience in OpenAI API integration, tool calling, agent memory, structured outputs and document processing. Focused on reliable, production-minded automation that removes manual work.

TECHNICAL SKILLS

AI & Automation: n8n, AI Agents, Workflow Automation, Multi-Agent Systems, Tool Calling, Agent Memory, Guardrails, Human-in-the-Loop

Generative AI: OpenAI API, LLM Integration, Prompt Engineering, Structured Outputs, Function Calling, RAG, Embeddings, Vector Stores, Document Processing, OCR

APIs & Backend Integration: REST APIs, Webhooks, OAuth, JSON, API Authentication, Google APIs

Platforms & Integrations: Google Sheets, Google Drive, Gmail, Slack, WhatsApp, Microsoft 365 / Outlook, LlamaParse

Production & AI Reliability: Error Handling, Validation, Retries, Logging, Monitoring, Cost Optimization, AI Evaluation, Security, Prompt Injection Defense

SOFT SKILLS

Problem-Solving, Time Management, Team Collaboration, Analytical Thinking

PROFESSIONAL EXPERIENCE

Freelance AI Automation Developer Present

- Build n8n workflow automations that connect client business tools through REST APIs, webhooks and OAuth-secured integrations.
- Develop WhatsApp automation and AI agent workflows that handle repetitive customer and operations tasks.
- Translate client requirements into automation designs with validation steps, error handling and fallback paths.
- Integrate LLMs through the OpenAI API using prompt engineering and structured outputs for reliable downstream processing.

PROJECTS

Telegram AI Customer Support Agent | n8n, OpenAI API, Google Sheets, Gmail 2026

- Built an n8n tool-calling agent with memory that answers Telegram customers in Arabic and English from a Google Sheets FAQ.
- Added human handoff: complaints and out-of-scope questions trigger a Gmail alert to the business owner.

AI Lead Qualification & CRM Automation | n8n, Webhooks, OpenAI API, Google Sheets 2026

- Designed a webhook workflow that scores leads 1–10 and labels them Hot/Warm/Cold using OpenAI with structured JSON output.
- Logs every lead to a Google Sheets CRM and sends instant Hot-lead alerts through Gmail and Telegram.

Appointment Booking & Telegram Reminder System | n8n, Google Calendar, Telegram 2026

- Automated bookings end to end: webhook intake, Google Calendar event, Sheets log, owner alert and Telegram confirmation.
- Scheduled pre-appointment reminders with the n8n Wait node and JavaScript timezone and date validation.

AI Bilingual Social Content Generator | n8n, OpenAI API, Google Sheets 2026

- Built a scheduled workflow that turns a Sheets topic queue into Arabic and English posts and hashtags using OpenAI.
- Saves drafts back to the sheet and sends them for approval via Gmail and Telegram (human-in-the-loop).

EDUCATION

Bachelor of Computer Science, Beni-Suef University 2024 – 2028

TRAINING & CERTIFICATIONS

Digital Egypt Pioneers Initiative (DEPI) – AI & Automation / n8n 2026 | In Progress

120-hour program

- Generative AI and prompt engineering with structured outputs; AI agents with tools, memory and guardrails.
- n8n workflow automation and API integration; RAG and multi-agent orchestration; OCR and document processing.
- AI evaluation, security and production monitoring.

NTI : Summer Training Machine Learning 16 Aug| 10 Sep 2026
